This facility has been modified in the Resource Conservation and Recovery Information System (RCRIS) to a Conditionall Exempt Small Quantity Generator (CESQG). This modification to RCRIS was done February 20, 1996 per the instruction of the State of Texas (TNRCC). The CESQG modification was based on responses TNRCC received to letters regarding their annual report. Due to the response received from this company, they have been coded as a CESQG. All supporting documentation can be found in TNRCC's central records.

TU Electric Company - Corporate  
Name Change and Facility Station  
Addresses

Dear Ms. Shields:

Per your request, TU Electric Company is providing the United States Environmental Protection Agency (USEPA) with this official notification of name change. Texas Utilities Generating Company (TUGCO), Texas Utilities Electric Services Company (TESCO), Dallas Power & Light (DP&L) and Texas Power & Light (TP&L) are now all operating divisions under TU Electric Company. This corporate name change became effective in January, 1987 and represents the Company's wishes to emphasize its corporate identity. This change does not affect company ownership, operational status nor personnel responsible for maintaining regulatory compliance within each of these divisions.

Additionally, attached is the list you requested regarding selected facility station addresses. Should you have any questions, please do not hesitate to call Mr. Ron Weddell at 214-979-8481. 9476  
972

Sincerely,

TESCO

XVI. WASTE MINIMIZATION (narrative description)

262.41(a)(6)

North Lake Steam Electric Station has sought to minimize the generation of hazardous wastes through the implementation of a hazardous waste training and management program. The only hazardous waste stream at this facility for which off-site disposal or treatment is required are solvents, thinners and degreasing agents. Whenever possible, this facility has sought to reduce the generated volume of these waste through segregation, recycling, and an emphasis on proper and appropriate application of hazardous (chlorinated) solvents. We also have an ongoing program to find and utilize non-hazardous solvents as a replacement for those products which have historically been utilized due to various employee safety criteria. However, due to the nature of many maintenance activities associated with the electrical generating industry and the need for high flash point solvents, thinners and paint removers which will not leave conductant residues, further minimization of these wastes beyond what was accomplished in 1984 is very unlikely. Corrosive waste streams, such as demineralizer regenerant wastes, are neutralized in permit exempt facilities prior to discharge to surface impoundments and/or subsequent release through NPDES permitted outfalls. Infrequently generated hazardous corrosive wastes, boiler acid-cleaning solutions, are neutralized in-line from the boiler prior to discharge to surface impoundments or to frac-tanks for deep well injection.

262.41(a)(7)

North Lake Steam Electric Station cannot truly quantify the volume reductions in hazardous waste generated for off-site disposal due to the cyclic nature of maintenance activities associated with electrical power plants. The volume of hazardous waste generated during a calendar year for off-site commercial management is entirely dependent upon equipment failures, planned and unplanned outages, turbine overhauls, boiler cleanings, etc. Many of these activities occur irregularly; as a result it would not be unusual for a single plant to generate 100-200 gallons of hazardous waste for off-site disposal one year and 100,000 gallons the next year.

Texas Utilities Generating Company  
 EPA Hazardous Waste I.D. Numbers  
 Correction of Facility Company Name

Dear Mr. Haze:

Pursuant to your telephone conversation with Dr. J. B. Headrick of our office on July 22, 1986, we are providing a list of facilities that are under the control of Texas Utilities Generating Company (TUGCO). Prior to January 1, 1984, some of these facilities had been under the company names of Dallas Power and Light (DP&L), Texas Electric Service Company (TESCO) and Texas Power and Light (TPL). On the aforementioned date all of these facilities were transferred to the ownership and operation of TUGCO. Please revise your records to indicate that TUGCO is the owner/operator of the facilities listed. All facilities were duly registered with the Agency in 1980 as required by the Hazardous Waste Management Regulations of RCRA.

Dear Mr. Tanner:

Re: Dallas Power & Light Co., 14901 North Lake Road, Dallas, Texas Site  
TDWR Application No. 10281, Registration No. 31880

We have reviewed Part A - Facility Background Information for the above referenced site and also the Affidavit of Exclusion which was recently submitted for the purpose of withdrawing the hazardous waste permit application from further consideration in accordance with the exclusion claimed.

Based on our review of Part A and the Affidavit of Exclusion, the application for a hazardous waste permit has been withdrawn. We are retaining certain portions of the Part A for incorporation into your solid waste registration file.

If I may be of further assistance, please do not hesitate to contact me.

Very truly yours,

*Charles Eanes*

**ENVIRONMENTAL PROTECTION AGENCY  
HAZARDOUS WASTE DATA MANAGEMENT SYSTEM  
FACILITY MAINTENANCE FORM**

This figure is a composite of 18 individual facility location maps, arranged in a grid. Each map shows a specific facility and its surrounding area, including roads, landmarks, and other features. The maps are labeled with facility names and numbers, such as "FACILITY 1" and "FACILITY 2". The maps are oriented with North at the top.

The maps are arranged in a grid of 3 rows and 6 columns. The first row contains maps for facilities 1 through 6. The second row contains maps for facilities 7 through 12. The third row contains maps for facilities 13 through 18.

Each map includes a scale bar and a north arrow. The scale bars are in miles, and the north arrows point towards the top of the map.

The maps show the following facilities:

- FACILITY 1: A small facility located near a road and a body of water.
- FACILITY 2: A small facility located near a road and a body of water.
- FACILITY 3: A small facility located near a road and a body of water.
- FACILITY 4: A small facility located near a road and a body of water.
- FACILITY 5: A small facility located near a road and a body of water.
- FACILITY 6: A small facility located near a road and a body of water.
- FACILITY 7: A small facility located near a road and a body of water.
- FACILITY 8: A small facility located near a road and a body of water.
- FACILITY 9: A small facility located near a road and a body of water.
- FACILITY 10: A small facility located near a road and a body of water.
- FACILITY 11: A small facility located near a road and a body of water.
- FACILITY 12: A small facility located near a road and a body of water.
- FACILITY 13: A small facility located near a road and a body of water.
- FACILITY 14: A small facility located near a road and a body of water.
- FACILITY 15: A small facility located near a road and a body of water.
- FACILITY 16: A small facility located near a road and a body of water.
- FACILITY 17: A small facility located near a road and a body of water.
- FACILITY 18: A small facility located near a road and a body of water.

The maps are oriented with North at the top.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
REGION VI  
1201 ELM STREET  
DALLAS, TEXAS 75270

July 21, 1981

Dallas Power & Light-North Lake Steam Electric Station  
Attn: R.W. Cox  
1506 Commerce Street  
Dallas, Texas 75201

EPA ID NUMBER: TXD 00 083 8946

FACILITY LOCATION: 14901 North Lake Road  
Dallas, Texas

This is to acknowledge that the Environmental Protection Agency has completed processing the information submitted in your Part A Hazardous Waste Permit Application. It is the Agency's opinion, based on the assumption that the information submitted is complete and accurate, you as an owner or operator of a hazardous waste management facility have met the requirements of Section 3005(e) of the Resource Conservation and Recovery Act (RCRA) for Interim Status. EPA has not verified the information submitted. If it is determined that the information is incomplete or inaccurate, you may be asked to provide additional information or in certain circumstances it may be determined that you do not qualify for interim status. In addition, this notice does not preclude a citizen from taking legal action under the provisions of Section 7002 of RCRA.

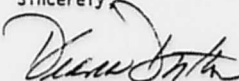

A facility not meeting the requirements for interim status under Section 3005 of RCRA may be required to close until such time as a hazardous waste permit is issued. Interim status may also be terminated, according to procedures in 40 CFR Part 124, if the owner or operator fails to furnish additional information which EPA requests in order to process a permit application.

As an owner or operator of a hazardous waste management facility, you are required to comply with the interim status standards as prescribed in 40 CFR Parts 122 and 265 or with State rules and regulations in those States which have been authorized under Section 3006 of RCRA. In addition, you are reminded that operating under interim status does not relieve you from the need to comply with all applicable State and local requirements.

The enclosure to this letter identifies the processes your facility may use, their design capacities and the types of waste your facility may accept during interim status. This information was obtained from the Part A Permit Application. If you wish to handle new wastes, change processes, increase the design capacity of existing processes, or change ownership or operational control of the facility, you may do so only as provided in 40 CFR Sections 122.22 and 122.23.

If you have any questions concerning this letter, please contact Dwight Corley at (214) 767-2765, or write Mail Code 6E-P, 1201 Elm Street, Dallas, Texas 75270.

Sincerely,

  
Diana Dutton, Director  
Enforcement Division (6E)

CONDITIONS OF OPERATION DURING  
INTERIM STATUS

Date prepared: July 21, 1981

The information shown below is based solely on the information that the owner and operator of this facility submitted in Part A of the Hazardous Waste Permit Application. This is not a determination by EPA that this facility is an environmentally acceptable facility for treating, storing or disposing of the hazardous wastes listed below.

I. Facility name, location and EPA identification number:

Name: Dallas Power & Light-North Lake Steam Electric Station  
Location: 14901 North Lake Road  
Dallas, Texas  
EPA ID No: TXD 00 083 8946

II. EPA considers the following to be the owner or operator of the facility and therefore the person(s) who must comply with the requirements set forth in 40 CFR Parts 122 and 265:

Owner's name: Dallas Power & Light Company  
Operator's name: Dallas Power & Light Company

III. During the period of interim status, the facility may use only the following processes for treating, storing or disposing of hazardous waste, up to the design capacities that are indicated:

Process Code	Design Capacity Amount	Unit of Measure
T04	140,000.	Gallons per day
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

IV. During the period of interim status, the facility may handle only the hazardous wastes with the following EPA Hazardous Waste Numbers, and/or solid wastes exhibiting hazardous characteristics with the following EPA Hazardous Waste Numbers:

D002 \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Please print or type in the unshaded areas only.  
Fill-in areas are spaced for elite type, i.e., 12 char. x 1/2 inch.

Form Approved OMB No. 158-R0175

FORM 1 GENERAL		U.S. ENVIRONMENTAL PROTECTION AGENCY GENERAL INFORMATION Consolidated Permits Program (Read the "General Instructions" before starting.)		I. EPA I.D. NUMBER	
I. EPA I.D. NUMBER		PLEASE PLACE LABEL IN THIS SPACE		EPA I.D. NUMBER	
III. FACILITY NAME				FTXD0008389463D	
V. FACILITY MAILING ADDRESS				GENERAL INSTRUCTIONS	
VI. FACILITY LOCATION				If a preprinted label has been provided, affix it in the designated space. Review the information carefully; if any of it is incorrect, cross through it and enter the correct data in the appropriate fill-in area below. Also, if any of the preprinted data is absent (the area to the left of the label space lists the information that should appear), please provide it in the proper fill-in area(s) below. If the label is complete and correct, you need not complete items I, III, V, and VI (except VI-B which must be completed regardless). Complete all items if no label has been provided. Refer to the instructions for detailed item descriptions and for the legal authorizations under which this data is collected.	
II. POLLUTANT CHARACTERISTICS					
INSTRUCTIONS: Complete A through J to determine whether you need to submit any permit application forms to the EPA. If you answer "yes" to any questions, you must submit this form and the supplemental form listed in the parenthesis following the question. Mark "X" in the box in the third column if the supplemental form is attached. If you answer "no" to each question, you need not submit any of these forms. You may answer "no" if your activity is excluded from permit requirements; see Section C of the instructions. See also, Section D of the instructions for definitions of bold-faced terms.					
SPECIFIC QUESTIONS		MARK X		SPECIFIC QUESTIONS	
A. Is this facility a publicly owned treatment works which results in a discharge to waters of the U.S.? (FORM 2A)		YES NO FORM ATTACHED		B. Does or will this facility (either existing or proposed) include a concentrated animal feeding operation or aquatic animal production facility which results in a discharge to waters of the U.S.? (FORM 2B)	
C. Is this a facility which currently results in discharges to waters of the U.S. other than those described in A or B above? (FORM 2C)		16 17 18		D. Is this a proposed facility (other than those described in A or B above) which will result in a discharge to waters of the U.S.? (FORM 2D)	
E. Does or will this facility treat, store, or dispose of hazardous wastes? (FORM 3)		22 23 24		F. Do you or will you inject at this facility industrial or municipal effluent below the lowermost stratum containing, within one quarter mile of the well bore, underground sources of drinking water? (FORM 4)	
G. Do you or will you inject at this facility any produced water or other fluids which are brought to the surface in connection with conventional oil or natural gas production, inject fluids used for enhanced recovery of oil or natural gas, or inject fluids for storage of liquid hydrocarbons? (FORM 4)		28 29 30		H. Do you or will you inject at this facility fluids for special processes such as mining of sulfur by the Frasch process, solution mining of minerals, in situ combustion of fossil fuel, or recovery of geothermal energy? (FORM 4)	
I. Is this facility a proposed stationary source which is one of the 28 industrial categories listed in the instructions and which will potentially emit 100 tons per year of any air pollutant regulated under the Clean Air Act and may affect or be located in an attainment area? (FORM 5)		34 35 36		J. Is this facility a proposed stationary source which is NOT one of the 28 industrial categories listed in the instructions and which will potentially emit 250 tons per year of any air pollutant regulated under the Clean Air Act and may affect or be located in an attainment area? (FORM 5)

Continued from the front

### III. PROCESSES (continued)

C. SPACE FOR ADDITIONAL PROCESS CODES OR FOR DESCRIBING OTHER PROCESSES (code "T04"). FOR EACH PROCESS ENTERED HERE INCLUDE DESIGN CAPACITY.

T04 - Neutralization in lined concrete basins; discharge to NPDES permitted outfall. The waste from the regeneration of the ion exchange demineralizer (corrosive waste D002) is mixed in the concrete basin with waste water from a reverse osmosis treatment system (no hazardous characteristics). The resultant mixture is neutralized as necessary for NPDES discharge. The process is intermittent.

### IV. DESCRIPTION OF HAZARDOUS WASTES

A. EPA HAZARDOUS WASTE NUMBER - Enter the four-digit number from 40 CFR, Subpart D for each listed hazardous waste you will handle. If you handle hazardous wastes which are not listed in 40 CFR, Subpart D, enter the four-digit number(s) from 40 CFR, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.

B. ESTIMATED ANNUAL QUANTITY - For each listed waste entered in column A estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in column A estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.

C. UNIT OF MEASURE - For each quantity entered in column B enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
POUNDS	P	KILOGRAMS	K
TONS	T	METRIC TONS	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure taking into account the appropriate density or specific gravity of the waste.

#### D. PROCESSES

##### 1. PROCESS CODES:

For listed hazardous waste: For each listed hazardous waste entered in column A, select the code(s) from the list of process codes contained in Item III to indicate how the waste will be stored, treated, and/or disposed of at the facility.

For non-listed hazardous waste: For each characteristic or toxic contaminant entered in column A, select the code(s) from the list of process codes contained in Item III to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

Note: Four spaces are provided for entering process codes. If more are needed: (1) Enter the first three as described above; (2) Enter "000" in the extreme right box of Item IV-D(1); and (3) Enter in the space provided on page 4, the line number and the additional code(s).

##### 2. PROCESS DESCRIPTION: If a code is not listed for a process that will be used, describe the process in the space provided on the form.

NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER - Hazardous wastes that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

- Select one of the EPA Hazardous Waste Numbers and enter it in column A. On the same line complete columns B, C, and D by estimating the total annual quantity of the waste and describing all the processes to be used to treat, store, and/or dispose of the waste.
- In column A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In column D(2) on that line enter "included with above" and make no other entries on that line.
- Repeat step 2 for each other EPA Hazardous Waste Number that can be used to describe the hazardous waste.

EXAMPLE FOR COMPLETING ITEM IV (shown in line numbers X-1, X-2, X-3, and X-4 below) - A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operation. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.

Dallas Power & Light Company  
Steam Electric Stations  
Consolidated Permits Program  
Application for RCRA Permit

Gentlemen:

Enclosed is Dallas Power & Light Company's applications for hazardous waste treatment facilities at the following steam electric stations:

<u>Generating Stations</u>	<u>EPA I.D. Number</u>
Parkdale	TXD000838920
Lake Hubbard	TXD000838938
Mountain Creek	TXD000838912
North Lake	TXD000838946

These applications are submitted on EPA Forms 1 and 3 of the Consolidated Permits Program.

We trust this filing is found to be complete and acceptable for permits under the Resource Conservation and Recovery Act.

Yours very truly,

*Max H. Tanner, Jr.*

<b>U.S. ENVIRONMENTAL PROTECTION AGENCY</b> <b>NOTIFICATION OF HAZARDOUS WASTE ACTIVITY</b>		<b>INSTRUCTIONS:</b> If you received a preprinted label, affix it in the space at left. If any of the information on the label is incorrect, draw a line through it and supply the correct information in the appropriate section below. If the label is complete and correct, leave Items I, II, and III below blank. If you did not receive a preprinted label, complete all items. "Installation" means a single site where hazardous waste is generated, treated, stored and/or disposed of, or a transporter's principal place of business. Please refer to the INSTRUCTIONS FOR FILING NOTIFICATION before completing this form. The information requested herein is required by law (Section 3010 of the Resource Conservation and Recovery Act).
